

## Hotel IP Solutions

# Traditional Hotel Networks

- ◆ High cost of networking deployment
- ◆ High cost of Maintenance
- ◆ Unable to upgrade
- ◆ High cost of internal communications

# High cost of networking installation

The deployment of the networking in the room  
need to equip with land line for analog  
phone(Total cost increase USD\$80/room)

# High cost of Maintenance

The further maintenance cost of traditional hotel phone system generate high maintenance service cost because of the human cost. Even some hotels need to hire an engineer dedicated for the maintenance of phone systems.

# Unable to upgrade

Traditional Hotel phone system is not able be upgraded to meet the customer's demand. An advanced communication system is becoming a trend to provide better customer service in hotel industry.

# High cost of internal communications

The internal communications between all extensions still rely on fixed land-line, high cost especially the international calls Which is higher than IP solutions.

# Our Solutions

# Advantage

Fanvil

## Save Cost

Cloud Server can save the cost of hardware equipment and maintenance cost.

## Rich Functionality

Hotel IP Solution can manage all IP extensions and support maximum 100,000 extensions registration

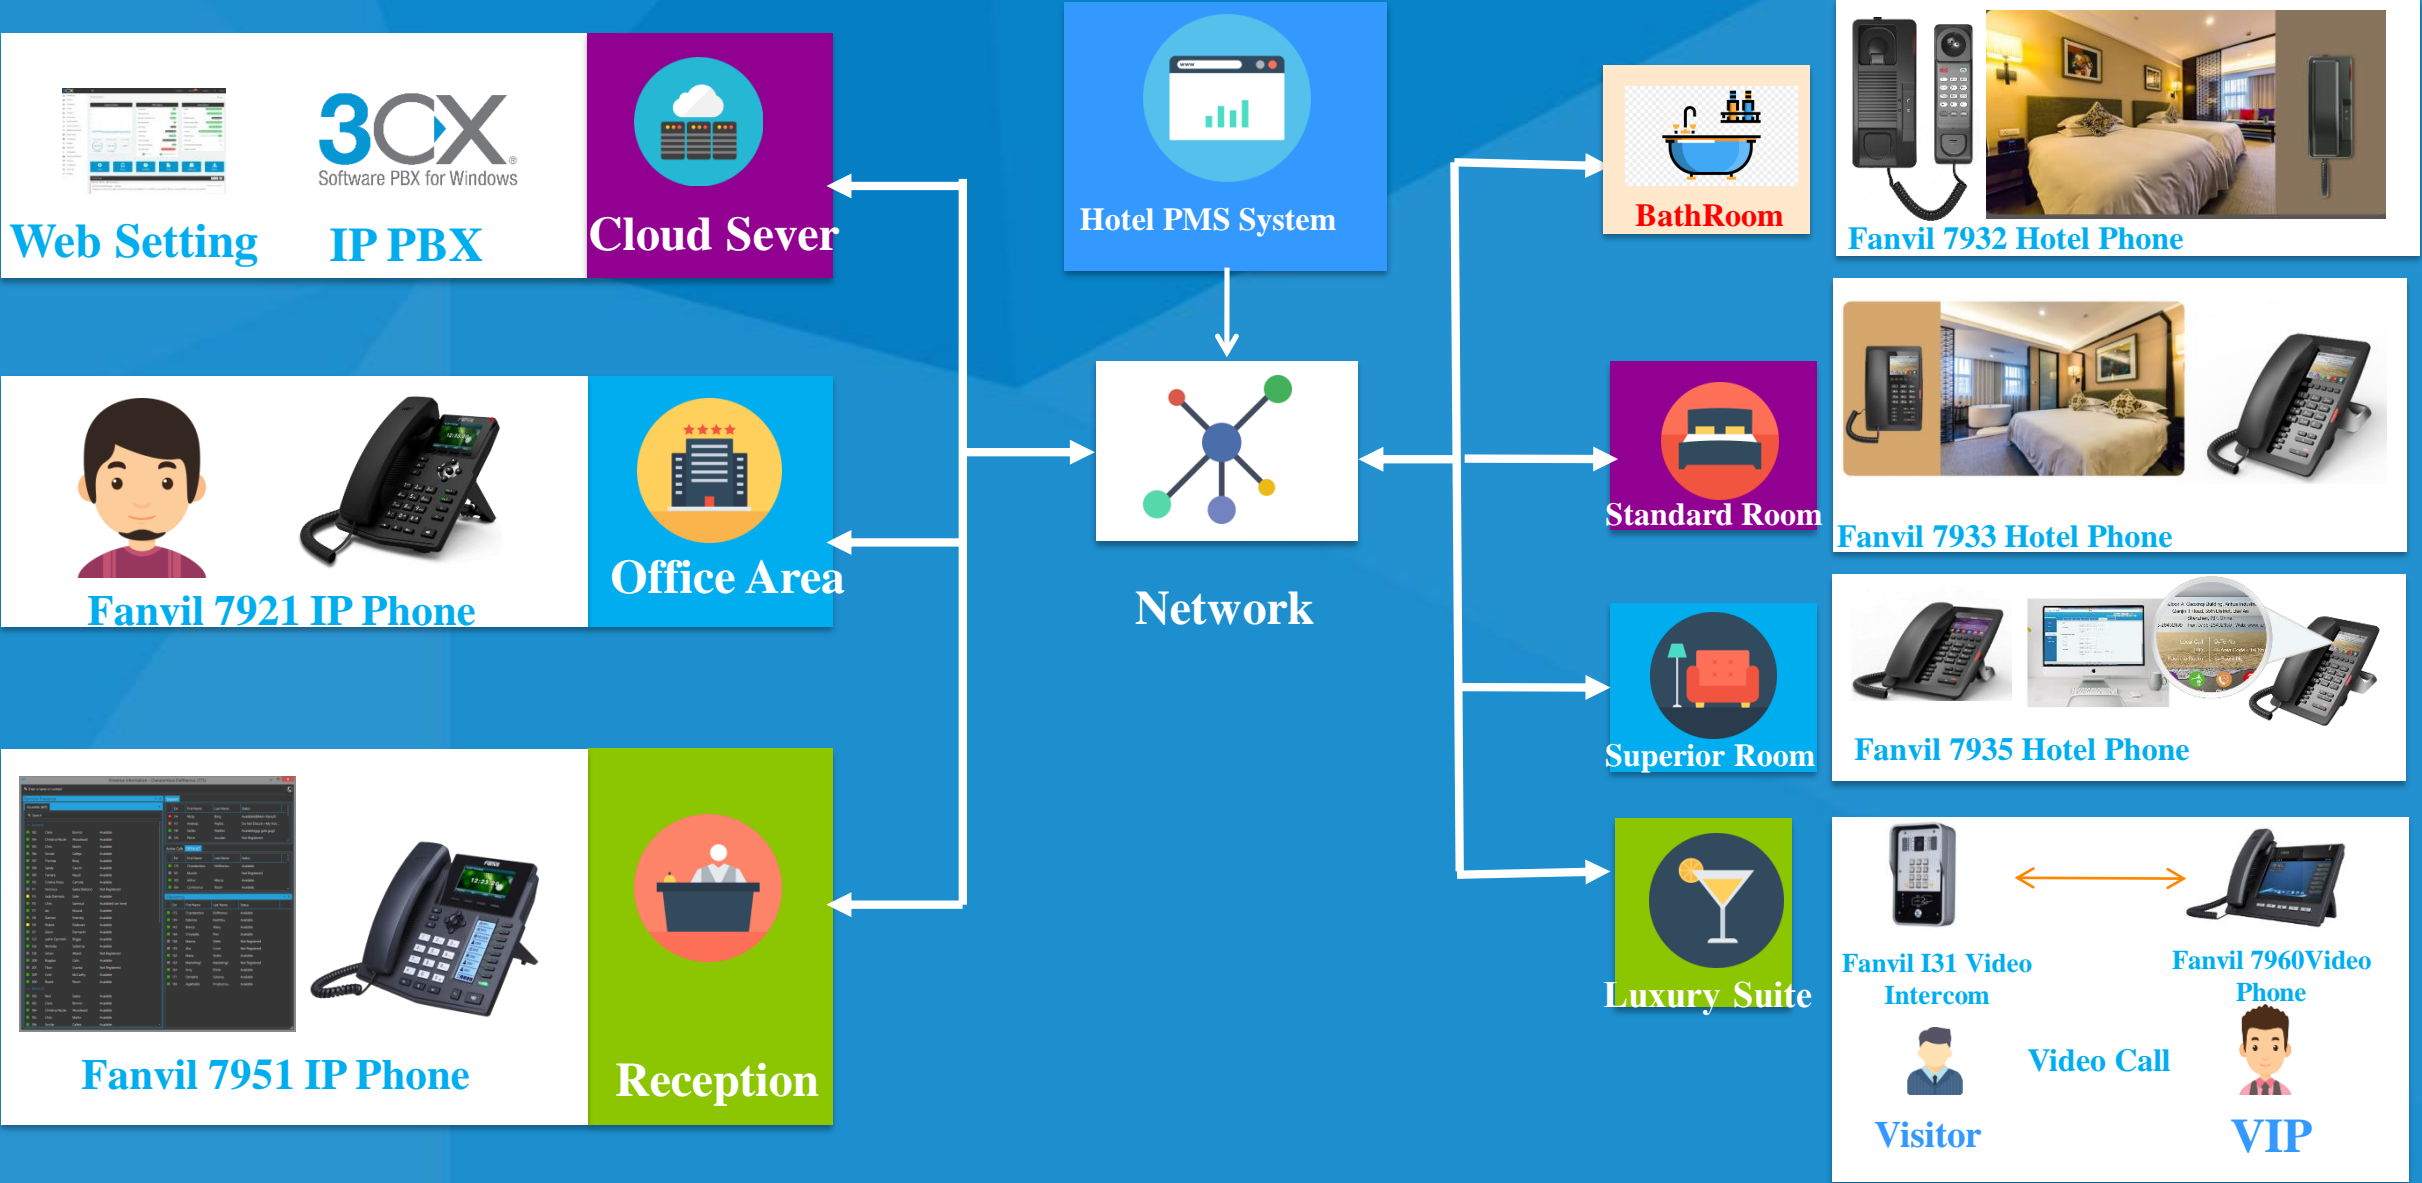

## One-time Investment

Hotel IP Solution only need to deploy one IP Phone in the guest room , no need additional land-line installation.

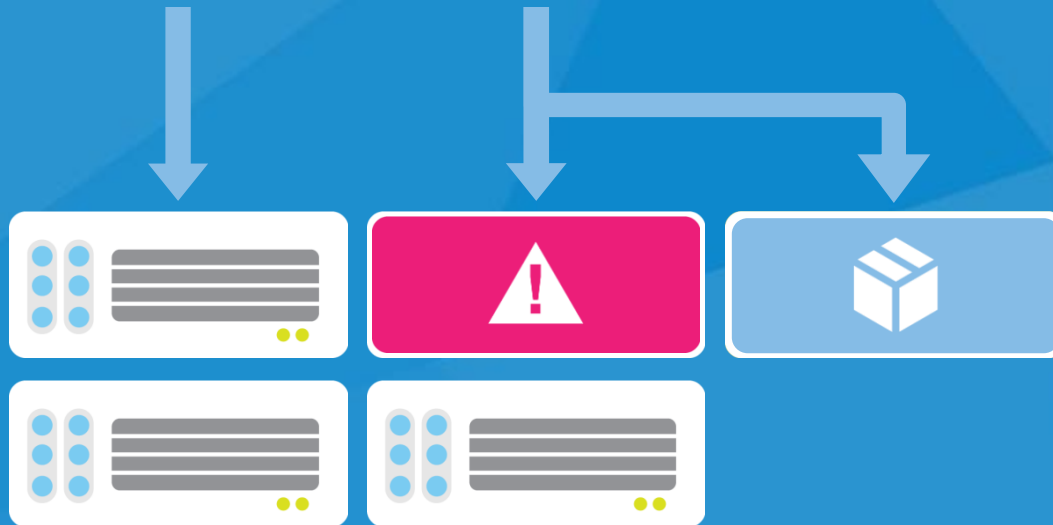

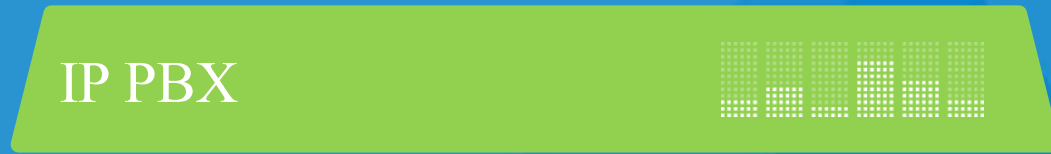

# Hotel IP Solution Topography

# Solution Advantage

- ◆ IP PBX support cloud provisioning
- ◆ Mainstream SIP protocol
- ◆ IP PBX support Web configuration
- ◆ Easy Deployment -Plug and Play

Call Transfer

Phonebook
